

# TASKI® Sani Des conc

Washroom cleaner and disinfectant

#### Description

TASKI Sani Des conc is a cleaner and disinfectant for all washroom surfaces.

#### Key properties

- · Versatile cleaner and disinfectant
- Disinfectant, effective against a wide range of micro organisms
- Fresh fragrance
- TASKI Sani Des conc is part of the unique EXACT dosing and packaging concept for accurate dosage and cost control

#### **Benefits**

- Removes common washroom soils
- · Reduces the risk of cross-contamination
- Leaves a pleasant fragrance
- Convenient and controlled dosing through the EXACT system

## Use instructions

## Dosage

Minimum dosage: 2 caps for 10 L solution in bucket (0.2%).

Increase concentration for heavy soiling.

 $\textbf{Spray cleaning method:} \ 1 \ \text{cap in spray bottle with } 500 \, \text{ml water (2\%)}$ 

### Application

## Spray cleaning:

- 1. Spray the solution directly onto surface (or onto a cloth for smaller areas, and wipe).
- 2. On heavy soil leave for at least 5 minutes.
- 3. Clean surface with cloth or sponge.
- 4. Rinse with clean water and allow to dry.

# Bucket cleaning:

- 1. Apply the solution with a cloth/sponge or mop.
- 2. Leave for at least 5 minutes.
- 3. Rinse with clean water and allow to dry.

## Technical data

Appearance Clear, red liquid

Relative density (g/ml at 20°C) 1.050 pH-value neat 10.2-11.2 pH-value for both solution rates 9.5-10.5

The above data is typical of normal production and should not be taken as a specification.

## Safe handling and storage information

**Safe handling:** Rinse and dry hands after use. The use of a skin reconditioning cream, such as Soft Care Dermasoft H9, may be beneficial. For prolonged contact, protection for the skin may be necessary. Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet.

**Storage Information:** Store in original closed containers away from extremes of temperature.

## Environmental information

The surfactants used in this product are biodegradable in compliance with the requirement of EC Directives 73/404/EEC and 73/405/EEC and their subsequent amendments.

#### Microbiological data

TASKI Sani Des conc passed EN 1276 at a dilution of 1% in hard water (300 ppm as CaCO<sub>3</sub>) and in dirty conditions (0.3% bovine albumin), and contact time of 5 minutes.

TASKI Sani Des conc will pass an European suspension test with high soil level (1.0% bovine albumin) at a 1% concentration and contact time of 5 minutes.
